

A wide-angle photograph of a golf course at dusk or dawn. In the foreground, a large sand trap with distinct ripples in the sand curves across the frame. To the left of the trap, a small patch of green grass is visible. In the background, a well-maintained green golf course stretches towards a line of trees under a soft, orange-hued sky. A yellow flag is visible on a pole in the distance.

Golf course Project

Created by Chad Harley
On behalf of ABC Consulting

SUMMARY

ABC Consulting was approached by investors from Fake Capital LLC to identify opportunities to construct a new Golf Course for their holding company.

It was asked that three recommendations be made for possible site locations as well as what the forecasted income that would be generated from the course.

CRITERIA

Possible site locations were determined by identifying State counties that contained a disproportionate number of existing golf courses in relation to the population.

Data was gathered from the U.S Census Bureau and from a Git Hub Repository that identified over 17,000 Existing golf courses

INITIAL FINDINGS AND CONSIDERATIONS

INITIAL FINDINGS

Course Type	Average Weekend Fee	Average Weekday Fee	Estimated Yearly vists
Private (9 holes)	\$21.00	\$18.00	19,200
Private (18 holes)	\$55.00	\$50.00	27,700
Private (18+ holes)	\$64.00	\$59.00	60,166
Public (9 holes)	\$16.00	\$14.00	24,800
Public (18 holes)	\$32.00	\$28.00	39,300
Public (18 + holes)	\$36.00	\$31.00	64,400

Estimated Income assuming 2/3 of rounds are played during a regular weekday

Course Type	Estimated Income
Private (9 holes)	\$360,200
Private (18 holes)	\$1,432,000
Private (18+ holes)	\$3,637,400
Public (9 holes)	\$314,200
Public (18 holes)	\$1,136,700
Public(18+ holes)	\$2,108,300

INITIAL FINDINGS CONT.

- On average there is 1 golf course for every 19,680 people in the population.
- On average courses with open guest policies received 1.02% more customers than clubs with closed policies.
- Courses that allowed for Tee Time Reservations had 61% more guests than courses that did not.
- Nearly 1/3 of the U.S. Population played a round of golf in 2024

SITE RECOMMENDATIONS

WEBB COUNTY, TEXAS

Population: 272,800

Population Growth: .84%

Existing courses:

Casa Blanca - Public – 18holes - \$12 Fees

Laredo - Private - 18 holes - \$80 Fees

Opportunity:

Model predicts a county of this size would have 9 courses, only 2 exist.

Opportunity exists to provide a course that splits the difference in fees while providing a private course experience.

Recommendation:

Construct a Semi-Private 18+ hole course, with \$50 Fees, Tee Time Reservation and open Guest Policy.

Income Estimate:

Assuming 45,000 rounds played a year, potential income from golf operations (Excluding merch and commodities) is ... \$2,250,000

SPOTSYLVANIA COUNTY, VIRGINIA

Population: 152,021

Population Growth: 1.6%

Existing courses:

Fredricksburg - Private – 18holes - \$35 Fees

Fawn Lake - Private - 18 holes - \$40 Fees

Lees Hill – Semi-Private – 18 holes - \$60 Fees

Oppurtunity:

Model predicts a county of this size would have 7 courses, only 3 exsit. Oppurtunity exists to provide a course that is open to the public and allows guests

Recommendation:

Construct a Public 18-hole course, with \$40 Fees, Tee Time Reservation and open Guest Policy.

Income Estimate:

Assuming 45,000 rounds played a year, potential income from golf operations (Excluding merch and commodities) is ... \$1,800,000

JEFFERSON PARISH, LOUISIANA

Population: 427,253

Population Growth: .37%

Existing courses:

7 Courses - 6 Private - All have 18 or more holes

Oppurtunity:

Model predicts a county of this size would have 12 courses, only 7 exist. Oppurtunity exists to provide a public course with lower fees

Recommendation:

Construct a Public 18+ hole course, with \$35 Fees, Tee Time Reservation and open Guest Policy.

Income Estimate:

Assuming 31,000 rounds played a year, potential income from golf operations (Excluding merch and commodities) is ...

\$1,085,000

JACKSON COUNTY, KENTUCKY

Population: 13,358

Population Growth: 1.67%

Existing courses:

None

Oppurtunity:

Model predicts a county of this size would have 3 courses, none exsit. Oppurtunity exists to provide a public course.

Recommendation:

Construct a Public 18 hole course, with \$25 Fees, Tee Time Reservation and open Guest Policy.

Income Estimate:

Assuming 31,000 rounds played a year, potential income from golf operations (Excluding merch and commodities) is ...

\$775,000

NEXT STEPS

Recommended next steps are:

- 1) Determine available locations in recommended counties.
 - 2) Determine cost of construction, permits, maintenance etc.
